# **Product overview**

AdvanCloud is a cloud-based software platform for remotely managing Keonn RFID systems:

- Encoding systems
  - Encoding stations: AdvanStation
  - RFID printers
- Automatic inventory systems
  - Handheld readers
  - Inventory robots: AdvanRobot
  - Overhead antenna systems: AdvanTrack
  - Smart shelves and smart displays: AdvanShelf, AdvanDisplay
- Interactive retail systems
  - Recommendation systems: AdvanLook
  - Interactive fitting rooms: AdvanFitting
  - Smart mirrors: AdvanLook-M
- Loss prevention systems
  - Overhead: ÁdvanSafe
  - Floor: AdvanMat
  - Pedestals: AdvanGate
- Point of sales systems: AdvanPay

# AdvanCloud servers

# **Benefits:**

- Access to real time information of the detected RFID tags and events in any location, from anywhere and at any time
- Easy and efficient remote management of Keonn products
- Remote management of content and user interface of Keonn interactive retail systems
- High scalability and flexibility
- Integrated pricing, including software application, data hosting and technical support
- Reduction of deployment time
- Reduction of spending on technology infrastructure
- Reduction of operational and maintenance costs

# **Applications:**

- Retail stores
- Libraries
- All applications using Keonn products

Follow us on twitter: @KeonnTech

### **Main functionalities**

All the **detected RFID tags** are recorded and stored in AdvanCloud in **real time**, and can be accessed from anywhere and at any time.

All the **interaction events** between the shopper and AdvanLook/AdvanFitting are also recorded and stored in AdvanCloud.

All the data stored in AdvanCloud can be easily exported or queried, in order to generate **reports**, apply **business intelligence** techniques, etc.

AdvanCloud also provides the **interactive user interface** for AdvanLook and AdvanFitting. This user interface can be easily customized for each retailer by using HTML5 and Javascript.

New **content** (images, videos, product descriptions, cross-selling rules, etc.) are easily uploaded to AdvanCloud. AdvanCloud automatically downloads the content to all AdvanLook/AdvanFitting units installed at retail stores.

**Content import** and **data export** can be executed remotely by means of a **web services API** that makes the integration with other systems very easy.

AdvanCloud also controls and manages the **tablets/PDAs** that store staff use to receive requests from shoppers and to answer these requests.

AdvanCloud user interface allows shoppers to interact with **social media** (Facebook, Twitter, Google+, etc.) within the store.

### **Benefits for Keonn partners**

With AdvanCloud, **Keonn partners** can generate **new sources of revenue** by building **new software applications** for retailers and providing **new services** to retailers:

- Upload and update content
- Verify consistency of the uploaded content and detect any missing content
- Modify the user interface of AdvanLook and AdvanFitting
- Develop dashboards and reports
- · Export interaction data in order to apply business intelligence techniques
- ...
